

Greenroof-Roofscapes® 9.0 Fleece

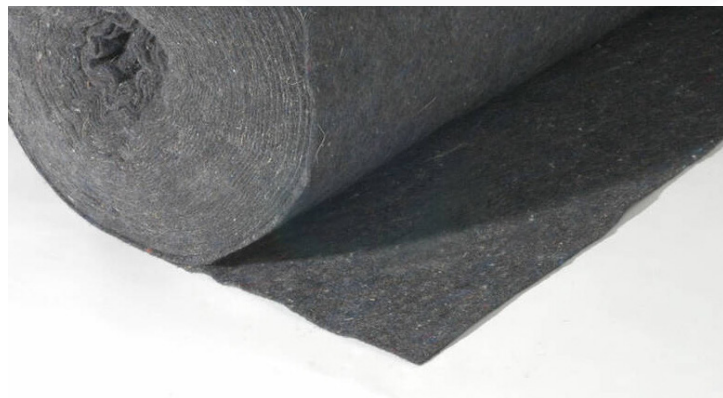

Between the World
and The Weather
Since 1928

Extensive Protective Fleece

DESCRIPTION

Our Extensive Protective Fleece is designed specifically for use within Extensive green roofing systems. Specific to this product, it:

- Protect the roof membrane and/or root barrier against damage from light mechanical demands.
- Separates materials of incompatible substrates from one another.
- Stores water and nutrients, depending on its function.
- Has a mass/structure and water holding capacity designed with the dead load weight and plant palettes of the Extensive roof system in mind to give the perfect balance of water holding capacity and protection.

PROPERTIES

TECHNICAL PROPERTIES

Materials	Polypropylene, Polyester & Recycled Acrylic Thread
Material Thickness	0.14", 9-oz.
Roll Dimensions (W x L)	6' 6.75" x 164.5"
Roll Diameter	1' 5.75"
Roll Weight	66 Lbs.
Total Saturated Weight	0.47 Lbs./ft ²
Water Holding Capacity	0.08 in ³ /in ² (0.049 gal/ft ²)
Rot & Pathogen Resistant	Yes
Puncture Resistant	Yes
Vegetated Roofing Use	Blu-Garden Extensive systems
Installation Requirements	Overlap fabric by 6"

APPROVALS

(800) 647-0100
